

# Industrial Construction

[www.ferrettiusa.com](http://www.ferrettiusa.com)

## Who **we are?**

Over one hundred years of activity and constant growth, even in the most complex economic scenarios, stand to prove the exceptional resources and technical capabilities of Ferretti, one of the most important and oldest Italian companies operating in the industrial construction, refractory linings and civil

works sectors. A company that today, as in the past, is running with ever-increasing passion and enthusiasm and innovation capacity.

Ferretti operates with a perspective of continuous improvement and technological innovation by upgrading human capital and skills.

**For more than 100 years our customers continue to choose us because we steadily dedicate to:**

- Reduction of delivery times
- Innovative approach to projects
- Customisation of our services according to customer needs
- Safety and workers protection are core values in which we strongly believe. The attention to our team comes first.

# The Industrial Construction Division

The Industrial Construction Division realizes “turnkey” industrial complexes in a vast variety of sectors.

Outstanding levels of professionalism have been handed down for over a century and are implemented to realize industrial foundations for light and

heavy industry, buildings, industrial furnaces, rolling mills, cogeneration plants, coke ovens, furnaces, incinerators using construction techniques that aim to reduce realization and plant shutdown timeframes.

|| Sectors:

Steel

Chemical

Pharmaceutical

Energy

Mechanical

**Ferretti is able to planning to best constructive process**  
using innovative technologies and proven in the method as:

**PFT**

“Preassembled Foundation Technology” is a know-how that is highly appreciated worldwide in a multitude of interventions and fields of application to reduce timing of revamping.

**EPC**

“Engineering, Procurement, and Construction” It includes the supply of engineering, procurement and construction that permits the realization of turnkey complexes.

**DFT**

“Deep Foundation Technology” is a Know-how that permit realization of deep foundation in a confined space, and reducing the volumes of excavation.

Mechanical

Petrochemical

Glass

Ecology

Lime

Cement

## Ferretti in numbers

(per year - Italy)

**1903**

year  
of birth

**125**

electric furnaces  
maintained per year

**2.463.540 ton**

of liquid steel produced  
by our clients per year

**2300 m3**

of structural  
concrete

**1157**

safety reports/near  
miss per year

**1372**

hour of training  
per year

**6500 m2**

environmental  
remediation

### Our vision

To create value over time through the optimization of human capital and advanced application methods. Transparency and fairness are the basic principles of our corporate governance model.

### Our mission

To create value by transforming challenges into opportunities and promoting innovation aimed at industrial growth
