Ferretti
USA Inc.

Who **we** are?

Over one hundred years of activity and constant growth, even in the most complex economic scenarios, stand to prove the exceptional resources and technical capabilities of Ferretti, one of the most important and oldest Italian companies operating in the industrial construction, refractory linings and civil

works sectors. A company that today, as in the past, is running with ever-increasing passion and enthusiasm and innovation capacity.

Ferretti operates with a perspective of continuous improvement and technological innovation by upgrading human capital and skills.

For more than 100 years our customers continue to choose us because we steadily dedicate to:

- Reduction of delivery times
- Innovative approach to projects
- Customisation of our services according to customer needs
- We strongly believe in our skills and our staff as human and intellectual capital

Refractory Lining

The Refractory Lining Division works to exceptionally high standards when installing refractory linings for new plant systems and during maintenance interventions in the steel, glass, limestone, cement, incineration, gasification, energy production boilers and petrochemical plant sectors.

Quality, safety and intervention times are key factors in a sector which have characterised the corporate image in its projects, both in Italy and abroad. Ferretti also implement an activity integrated with refractory and mechanical maintenance work to provide its customers with a “Global Service”

|| Sectors:

Steel industry

Cement

Limestone

Glass

Ferretti is able to planning to best constructive process
using innovative technologies and proven in the method as:

NEW INSTALLATIONS

We realize refractory linings for new plants intervening with technologically advanced equipment that provide strength and durability.

REFRACTORY MAINTENANCE

We take care of regular maintenance by focusing on the design of maintenance, ordinary, preventive and predictive.

MECHANICAL MAINTENANCE

We take care of maintenance in the most sensitive sectors, from steel plant to engineering, ensuring safety in the operation and quality of work.

Industrial assembly

Boilers

Aluminium

**Waste-to-energy
plants**

**Gasification
plants**

Ferretti in numbers

(per year - Italy)
